

Remote Authentication Dial In User Service (RADIUS) is an [AAA \(authentication, authorization and accounting\) protocol](#) for applications such as network access or IP mobility. It is intended to work in both local and [roaming](#) situations.

RADIUS is a common authentication protocol utilized by the [802.1x](#) security standard (often used in wireless networks).

source - RADIUS. (2006, August 30). In *Wikipedia, The Free Encyclopedia*. Retrieved August 31, 2006, from <http://en.wikipedia.org/wiki/RADIUS>

Besides authenticating against our internal database of users, Hautspot venues have the ability to authenticate against third party RADIUS servers.
